

# THE WRANGELL SENTINEL

VOL. XIX. NO. 10

WRANGELL, ALASKA, THURSDAY, FEBRUARY 26, 1920

PRICE TEN CENTS

## News by Cable Today From All Over the World

LONDON—The Allies will decline to deal with Soviet Russia "until they have arrived at the conviction that the Bolshevik horrors have come to an end," it was announced after the meeting of the Allied supreme council today.

BERLIN—Burglars rifled the mausoleum of Charlottenberger Castle and removed the jewels from Queen Louisa's coffin, and also removed the gold and silver gilded crowns lying on the coffins of Emperor William I, Empress Augusta, Prince Albrecht and others.

SAN FRANCISCO—Liquor may not be sold on strictly coastwise vessels either in port or outside the three-mile limit according to a ruling from Washington received here by the collector of customs.

NEW YORK—Joe and Irving Gluck, brothers and Wall street messenger boys, have confessed that they turned over five million dollars in money and 23 million in stolen securities to Nicolas Arnstein, head of the most gigantic robbery plot in history.

LONDON—Workers at Pieve di Soligo have seized the municipal buildings and proclaimed a Soviet government, according to a Rome dispatch. In the fighting between the workers and the carabinieri many persons were wounded.

BERLIN—Erzberger, minister of finance, resigned from the cabinet. His resignation is due to testimony adduced in the libel suit brought by him against Helfferich, former Minister of the Treasury.

PARIS—The Council of Ambassadors today decided that the excess German shipping which was not distributed to the Entente powers will be destroyed.

SEATTLE—Robert W. Baxter resigned Saturday as vice president and general manager of the Alaska Steamship company and the Copper River & Northwestern railroad. The resignation is effective as to the railroad in March and the steamship company in April when the annual meetings will be held. Mr. Baxter has contemplated this action for the past six months. He will take an extended vacation in California and then resume railroading.

WASHINGTON—Rear Admiral Edwin Peary, arctic explorer and discoverer of the North pole died following an operation for pernicious anaemia. He was 68 years of age and was the author of a number of scientific books.

PARIS—The steamship Danube struck a mine in the Black sea. Thirteen persons were killed by the explosion although the vessel succeeded in reaching Constantinople.

LONDON—The Bolsheviks' forces have captured Archangel on the White sea according to a wireless dispatch received from Moscow. The whites have abandoned the town and the troops have joined the Bolsheviks, the message declared.

LONDON—The Government's bill for Irish home rule was presented in the House of Commons today. The measure received its first reading.

## The Price of Meats Must Be Reduced Says Atty. General

CHICAGO—Attorney General Palmer has served notice on the meat packers that unless there is a country-wide reduction in the price of meats their books must be submitted to federal agents for inspection.

SAN DIEGO—Maurice Maeterlinck, the world famous Belgian poet, is suffering from an inflamed eye caused by getting a cinder in it. On account of this he has cancelled his engagements here.

WASHINGTON—Bainbridge Colby of New York will succeed Robert Lansing as Secretary of State, it was announced from the White House today. Mr. Colby is 49 years of age and has practiced law in New York City since 1892. He was appointed Commissioner U. S. Shipping Board in July 1917, and was a member of the American mission to the Inter-Allied Conference in Paris in November 1917. He is a member of the Civil Service Reform Association, and a member of the Authors' League of America. He was born in St. Louis and is president of the Missouri society of New York City. He was actively identified with the presidential nomination of President Roosevelt and was one of the founders of the Progressive Party. He was the Progressive candidate for U. S. senator in 1914, 16. In 1895 he was married to Nathalie Sedgwick in 1895.

WASHINGTON—The President today signed the Mineral Oil Land Leasing Bill which becomes effective at once.

BURLINGTON, Vt.—Federal agents boarded the Montreal Boston passenger train and at Alburg, on the Border, seized 168 quarts of whiskey from Americans who had gone to Canada to celebrate Washington's birthday.

LONDON—Premiers Lloyd George and Nitti have agreed to a complete resumption of commercial relations with Russia, but will have no dealings with the Soviet government.

TACOMA—A detachment of the 35th Infantry from Camp Lewis has been ordered to Montezano for guard duty during the I. W. W. murder trial.

SEATTLE—Postmaster Joseph A. Paschick of Cumberland, Wash., was killed this morning in a revolver duel with two bandits who were attempting to rob the postoffice.

WASHINGTON—The peace treaty came back to the floor of the Senate today. It will be given the right of way until disposed of and not allowed to drag along interminably. On that point both the majority and minority are alike agreed. It is believed that three weeks will be consumed before the final vote is reached.

The current issue of the War Cry has its whole front page made up of illustrations of the Wrangell district. There is a large cut of the totem pole which stands in Willis Hoagland's yard. There is a picture of the Native town of Bayview where the recent Salvation Army Congress was held. The page also shows likenesses of Ensign and Mrs. W. J. Carruthers, the district officers, Envoys and Mrs. Mather and Envoy Matthew Auckland.

## New Logging Camp Established

On Banks Island by Gordon McDonald.—One of First Camps in Alaska to Use High Lead Method.

The Marguerite, Darby Choquette master, left Wrangell at noon Sunday having in tow the big new two story scow of G. D. McDonald & company.

The scow was taken to Banks Island where Camp 3 of the above company will be located.

The new scow was built by G. D. McDonald and James Allen and is a rather commodious affair with complete accommodations for 40 persons. On the lower floor there are store rooms, dining-room and kitchen. On the second floor there are sleeping accommodations for the logging crew and a private office for the camp foreman. A crew of 13 men were taken on the scow. A considerable shipment of additional logging machinery will arrive on the freighter Ketchikan within a few days. When this additional equipment arrives the crew will be increased to 40 persons.

The scow was by no means empty when she left Wrangell. In addition to a considerable quantity of heavy cable and other equipment the cargo included 45 tons of groceries.

James Allen will be camp foreman at Camp 3 which for the present will supply logs exclusively for the Willson & Sylvester Mill company at Wrangell. When this camp gets into operation under full capacity it will have a daily output of from 75 to 80 thousand feet B. M.

Mr. McDonald has two gas boats which are now being overhauled. In the meantime the Jada, owned and operated by Oscar Case is being used as a camp tender. Mr. McDonald will divide his time between the Banks Island camp and his piling camp on Prince of Wales Island near Salmon bay.

The Beaulaire Packing company, of Portland, Ore., which last year built and operated a salmon cannery at Port Beaulaire, Kuiu Island, Alaska, will make extensive additions in the way of new machinery and buildings preparatory for the 1920 season, according to Walter Henningsen, manager of the company.

An Iron Chink, an Anderson filling machine and a Wright & Smith 15-minute exhaust box will constitute the additions to the machinery, while a mess house and two new warehouses will also be added.

The company is preparing for a good-sized pack this year, which will be sold under the following brands: "Bepco," Alaska Reds; "Beaulaska," Medium Reds; "Blanchard," Pinks; and "Beaulaire," Chums. Practically the entire pack will be distributed through the Henningsen Produce company, which maintains some 30 branch houses in the produce business, and also operates three milk condenseries.—Pacific Fisherman.

The revenue act provides an exemption of \$1000 for single persons, \$2000 for married persons and heads of families, and an additional exemption of \$200 for each person dependent upon the taxpayer, if such person is under 18 years of age, or incapable of self support. It is just as necessary to make a report when the income equals the above amounts as when it exceeds them. The law makes no exceptions, the penalty for failure being a fine of not more than \$1000.

## Cassiar Will Have Boom the Coming Season

Capt. G. W. Pendelton Will Take In Three Dredges for Operation on McDames Creek—George Adams Will Have in Operation on Tibet Creek the Largest Hydraulic Proposition on the Continent.

Everything portends a boom in the Cassiar during the coming season.

The mere fact that well known, experienced and successful mining men are going into the Cassiar at this early date is sufficient evidence that there will be great activity in that region during the next six or eight months.

Captain George W. Pendelton, president of the Pendelton Gold Mining corporation, left Wrangell this morning for Telegraph Creek from which point he will go to McDames creek, a total distance of about 340 miles from Wrangell.

"Dickey" Davis of Wrangell accompanied Captain Pendelton up the river and will probably enter his employ as soon as the property is reached.

When the Princess Mary arrived in port Tuesday morning several of the old-timers noticed that Captain George W. Pendelton was among the through passengers. Conversation with him disclosed that he was en route to Telegraph Creek via Atlin. He was at once informed that there was no need of his going half way around the world to get to Telegraph Creek when the ice on the Stikine at the present time is as smooth as glass. He very much appreciated this information and lost no time in getting his baggage released.

Captain Pendelton brought two dogs and a sled with him. He managed to get another dog here, and no one has any doubt that he will reach his destination safely. He is no chechaco, having first come north as a navigator in 1873. He went into the Cassiar in 1906 and since then has spent considerable time in that region.

The Pendelton Gold Mining Corporation is incorporated under the laws of the State of Washington. The amount of the capital stock is \$500,000, all common, fully paid, non-assessable. After the opening of navigation on the Stikine three dredges will be shipped in, each having a capacity of 600 cubic yards every 24 hours. The dredges that have been contracted for are all of steel construction throughout. The manufacturers are under a \$15,000 bond for each dredge as a guarantee that it will meet the requirements. Captain Pendelton says the type of dredges he is going to use do their work with a thoroughness that is almost incredible. He states that it has been proven repeatedly by demonstration that one may mix 500 or more of the finest bird shot into any quantity of dirt, and the dredge will separate the shot from the earth without a single one of the tiny shot getting away. No sluice boxes are required, the dredge being operated by compressed air and water jets.

Captain Pendelton has contracted with Sid Barrington of the Barrington Transportation company to take the dredges up

the river from Wrangell as soon as they reach here.

Captain Pendelton's purpose in going to the property so early in the season is in order to have a supply of cord wood on hand when the first dredge arrives. There is an excellent water power site only a short distance from his property and it is his intention to electrify the dredges as soon as practicable.

The property of the Pendelton Gold Mining corporation is located on McDames Creek about 175 miles from Telegraph Creek. Captain Pendelton is of the firm opinion that the property of his company contains rich deposits of gold which will not fail to yield an immense fortune.

In the following paragraphs we quote Captain Pendelton's own words regarding what he characterizes as "a vast natural reservoir of gold:"

"Sweeping out of a canyon, cut for the most part through solid rock, McDames Creek runs for two miles through a level valley, perhaps 400 feet wide at the mouth of the canyon and 3000 feet at the lower end. On either side the hills rise abruptly, at some points in terrace, with first second and third benches. In the benches are numerous streaks of pay dirt, varying in thickness from one inch to a foot or more, of a soft mixed nature.

"This, then, is the situation. Above the canyon, on either side, the hills with their streaks of gold-bearing earth. The level valley floor is the gravel and earth that has been washed from the hills on three sides.

"For millions of years the process of erosion has been going on, carrying the earth and gravel from the hills to the creek, and along with it the gold it contained.

"The gold of countless centuries is all in the bottom of that valley—all but a comparatively few thousands of dollars' worth that has been taken out by prospectors. It is a natural sluice box, a reservoir of gold.

"With the knowledge of pay streaks in the hills, it would be easy to reason that this statement must be true, even if there were no concrete evidence to support the theory. But it has been proved beyond a shadow of doubt, by actual prospecting.

"Overlying the floor of the valley is from 12 to 14 feet of washed gravel, sand and small boulders, it has been demonstrated, carrying small values of gold.

"Underneath the gravel and sand there is a red ruby sand of unknown depth. No one has yet sunk through it because of the water interfering with operations. But several different miners have reached it and always with the same result. *It has invariably been found to carry coarse gold from \$5 to \$35 in value per cubic yard!*

"One party of six some years ago sunk a hole about 100 feet up the creek from where the Pendelton Gold Mining Corporation's pump is installed and with the use of a number of Chinese pumps uncovered about 20 feet square of this ruby sand, working in a foot of water. From this small space and under these difficulties they saved about six thousand dollars in dust and nuggets. Then the creek rose. It had been an unusually dry season and the water was low, which was the only reason they were able to work at all. When the rise came it washed out their equipment and filled the hole they had made, effectually blocking further operations.

"So much for the ruby sand. It is there. It has been proven to be sensationally rich in gold. Below it no one has ever gone. No one has ever reached bedrock.

## P.C. McCormack Is a Candidate For Senator

JUNEAU—Hon. P. C. McCormack of Wrangell has filed as candidate for senator in the Republican primaries. Mr. McCormack consented to make the race only at the earnest solicitation of many leading Republicans who have promised him their most hearty support.

### Another New Building

The Willson & Sylvester Mill company have built an addition to their wharf in order to have room for the construction of a box shed 150 feet long by 40 feet wide. A considerable supply of boxes will be kept in this shed at all times, thereby making it possible to bring the barge in and load quickly and get out again in the least possible time.

The mill will be a busy place during the next few months, as four million feet of lumber will be required for the manufacture of the boxes now booked for delivery. The box orders are from various canneries in the Territory extending from Auk harbor on the north to Chomley on the south.

### Silver Fox Brings \$720

NEW YORK—Clear silver fox advanced 25 per cent over fall prices at the annual fur auction sales here yesterday.

Medium grades were unchanged, but lows advanced 20 per cent. The top price paid for silvers was \$720, the high price for reds was \$71.

Northern red fox showed no change from fall quotations.

The total sales recorded since Monday, when the sales opened, amount to \$4,450,000.

Mr. and Mrs. William Patterson arrived home this week from Juneau where they spent the past three weeks.

But bedrock is there, of course. And if the upper part of the ruby sand runs from \$5 to \$35 per yard in gold, can you imagine what must be the extent of the wealth lying upon the bedrock itself? The deeper you go, the more gold, for gold, being the heaviest of minerals, seeks the bottom. It must be one of the richest deposits of gold ever known.

"With the existence of the gold thus proved, why has it not been taken out? Why have a paltry few thousands been the entire output of this marvelously rich sluice box of gold?

"Simply because one-man methods will not succeed. The pan and bucket and shovel are useless. The gold lies beneath the water level. The creek cannot be kept out. Man unaided is completely baffled by the obstacles nature has placed in his way to protect her treasure.

"And in the ruby sand and along the bed rock of the entire valley, as proved by every prospect hole that has been sunk, there are millions. It is a vast natural reservoir of gold."

George Adams who had made a clean-up on Tibet Creek last season was aboard the Princess Mary Tuesday morning. He was en route to Atlin from which point he will go to his property. Mr. Adams is preparing for the operation on his property of four distinct hydraulic plants, each using two No. 6 Giants. These will make this the largest hydraulic proposition on the continent.

## Of Interest to Trappers

### Glacier Bay Trapper Gets 23 Cross Foxes

Charlie Spurgis, who is trapping at Glacier bay just inside Cape Spencer, is finding trapping good in that locality. When he came into Tenakee last week for supplies he reported having caught 23 cross foxes [average value about \$60], 20 lynx and 15 mink.

### Trappers From Iskut Come in for Supplies

Rolla Shangle and Earl Shangle who are trapping on the Iskut, and Frank Shangle who is trapping at Shakes point, arrived Saturday evening and spent Sunday and Monday in Wrangell. The Shangle party have been up the river since October 15. They report the catch was light during the early part of the season on account of the light fall of snow, but that at the present time trapping is good and the season's catch will be a profitable one. They say that lynx and wolverine are scarcer than usual up the river this year. The majority of the skins they have obtained thus far are marten, mink and muskrat. Rolla reports that his wife caught a nice black fox a few days ago.

Fur trappers are still able to make money in Indiana and thousands of dollars are paid annually for the pelts of animals to be found along streams in this state. Two Jackson county trappers report having sold pelts taken in 26 days for \$1,192. One day's catch sold for \$92. Included in the sale were 487 muskrat pelts at an average of \$2.60; ten raccoon, at an average of \$5; thirty-two skunk, averaging \$4 and forty-five opossum at an average of \$1.30. The open season for opossum, fox, beaver, otter, raccoon and skunk is from November 20 to February 2. Muskrats and mink may be taken from November 1 to April 1. Irvington boy trappers are even making Christmas money on muskrat and rabbit pelts. These Indiana furs pass through many hands before they reach the markets, ready to attract the attention of garment buyers. Furs have advanced in price, but fashion says that fur shall be worn and the sales have not diminished. The prices paid trappers are higher than that of a few years ago and the general increase is reflected all along the line.—Indianapolis News.

CHARLESTOWN, Prince Edward Island—Fox ranching on this island province is steadily growing and this season it is estimated that about 5,000 will be shipped from here. The prices range from \$1,000 each for silver fox skins down to \$10 for the cheapest reds. Ranchers are giving up the breeding of the cheaper grades of foxes as they cost just as much to feed as the others and domesticated reds are now a rarity. A number of individual farmers in this province are starting small fox ranches.

ROUNDUP, Mont.—E. Gautier of Antio, Wis., heads a party of men from that state who are contemplating raising beaver in this section for their fur. A site on Willow creek in the Snowy mountains is under consideration, it is stated. Beaver fur commands increasingly high prices, Mr. Gautier says, and his associates believe they can be grown for the market with great profit.

More than 20 millions of people live and prosper in European countries where the climate is less favorable than in Alaska.

## Suspension of Sale of Engine Distillate

Does Not Apply at the Wrangell Station

The company was, with great regret, forced to suspend the sale of engine distillate. It is to be hoped that the sale may be resumed, but conditions are such that very little encouragement in this direction can be held out.

Engine distillate comes from refinable crude oil. The gasoline is first taken from the refinable crude, then distillate and then kerosene. The danger of the company being compelled to suspend the sale of engine distillate has existed for a considerable time. Only because of the fact that the company has had on hand a stock of oil which would yield adequate quantities of engine distillate, and because it was possible for the company to purchase distillate elsewhere, has it been possible to continue the sale of distillate even up to this time. Now this stock of oil utilized for manufacturing distillate has been consumed and at the same time the hitherto available supply of distillate to be had by purchase has disappeared. The supply of engine distillate is, consequently, too small for effective distribution. These facts, coupled with an increasing and imperative demand for other and more important petroleum products has made it necessary to cut off engine distillate. There are substitutes for engine distillate, but none, generally speaking, for the other products. Hence the company has been obliged to sacrifice engine distillate.

The company does not itself produce refinable crude in sufficient quantities, and has found it impossible to purchase sufficient crude to supply the demand for engine distillate and still meet its obligations to consumers in other respects.

The company has been purchasing large quantities of refined products in the Mid-West fields to meet the requirements of consumers on the Pacific Coast, and will continue to do so as long as possible, but cannot purchase engine distillate in the East where it is not in general use and where it is not, therefore, generally manufactured.

Referring to our letter of January 16th, in which we stated that the supply of engine distillate was exhausted and when your present stocks were disposed of they would not be replenished.

This does not apply to your station. Our company has decided to use every effort to take care of the requirements of engine distillate in Alaska. The fact that no other oil companies operate in Alaska, is the reason we are making this exception. In all other fields the trade is served by other companies besides ourselves, and are in a position to go to competitors for their requirements of engine distillate. However, this is not true of Alaska, and you can notify your trade that it is our intention to endeavor to keep sufficient stocks of engine distillate in Alaska this season to meet the requirements of all the trade. This only applies to the fishing season of 1920. After that time it is very probable that no more will be marketed.

Dawson News: Arrivals from points along the West Dawson trail, where they have been hunting recently, report that a number of stray dogs have been eating carcasses of caribou which various hunters had killed and dressed and left beside the trail while awaiting conveyances to bring them to Dawson. In some instances the dogs consumed whole carcasses and in others they chewed off only portions of the animals. It is believed that some of them are stray Indian dogs. They were last seen about five miles from town.

## Save Money on Your Magazines

Place Your Subscription Orders Now and Take Advantage of the Present Low Prices

All of the following periodicals will materially increase their subscription rates in the near future: American Magazine, Cosmopolitan, Everybody's Magazine, Good Housekeeping, Harper's Bazar, Hearst's Magazine, Modern Priscilla, Motor Boating, Red Book, Popular Science Monthly, Vanity Fair, Blue Book and many others.

A glance at these prices will show you the advantage of placing your subscription orders now.

American Magazine (until May 1, 1920)	\$2.00
American Magazine (after May 1)	2.50
American Magazine (2 years until May 1, 1920)	3.00
American Magazine (2 years after May 1)	4.00
Everybody's Magazine (until April 1, 1920)	2.00
Everybody's Magazine (after April 1)	2.50
Everybody's Magazine (2 years until April 1, 1920)	3.00
Everybody's Magazine (2 years after April 1)	4.00
Good Housekeeping (until February 28, 1920)	2.00
Good Housekeeping (after February 28)	3.00
Harper's Bazar (until April 1, 1920)	4.00
Harper's Bazar (after April 1)	6.00
Harper's Magazine (2 years for the month of February only)	6.00
Hearst's Magazine (until March 20, 1920)	2.00
Hearst's Magazine (after March 20)	3.00
Motor Boating (until March 10, 1920)	2.00
Motor Boating (after March 10)	3.00
Pictorial Review (2 years, until April 15, 1920)	3.00
Pictorial Review (2 years, after April 15)	3.50

The Modern Priscilla will soon be increased to \$1.75 a year. For a short time a two year subscription may be had for \$2.50.

After March 1st The Saturday Evening Post will cost \$2.50 a year to all points in the United States west of the Mississippi.

From present indications there are likely to be an unusual number of changes this year, as publishers advise that the price of paper and labor is increasing rapidly. We find, for example, that the cost of white paper, to mention only one item, has advanced 70% as compared with 1914.

You will be assured of the lowest prices obtainable and of quick, efficient service if you order your magazine through the Robert M. Edmunson Magazine Subscription Agency.

## Chas. Goldstein & Company

"On top of the world—paying the top of the market"

In presenting the following quotations we want you to understand that we pay what we quote. If the market advances after the issuance of this circular we give the shipper the benefit of the increase. Upon request we shall be pleased to keep you advised of market changes.

Bear in mind that because of our policy of dealing direct with the trapper and trader we can afford to, and do, PAY THE HIGHEST PRICES FOR FURS OF ALL KINDS.

Black Bear, No. 1 Silky	\$15.00	to \$30.00
Mink, Extra Large No. 1	20.00	to 25.00
Fox, Cross Large Dark	75.00	to 125.00
Fox, Red, Large Dark	40.00	to 60.00
Fox, White	50.00	to 65.00
Fox, Blue: Prices vary according to color and quality	75.00	to 200.00
Fox, Silver: We have a big outlet for Silver Fox and guarantee top prices for same. Be sure to ship us your Silver Foxes and we will show you we are there with the goods. Prices are	150.00	to 850.00
Fisher, Large Dark	75.00	to 125.00
Mink, Extra Large No. 1 Dark	12.00	to 16.00
Muskrat, Full Alaskan Large No. 1	1.50	to 2.00
Lynx, Extra Large No. 1	40.00	to 60.00
Land Otter (Interior)	30.00	to 40.00
Land Otter (Coast)	20.00	to 27.50
White Weasel, Large No. 1	1.25	to 2.00
Wolf, Large No. 1 Cased	25.00	to 30.00
Wolf, Large No. 1 Open	18.00	to 25.00
Wolverine, Large Dark	20.00	to 25.00

We are the largest dealers in raw and manufactured furs in the Northwest and all we ask of you Mr. Shipper is to give us the chance of a trial shipment and we will convince you that we pay more for furs and make quicker returns than you can get anywhere in the country. We have been in business in Alaska for 36 years and have built up a very extensive trade. We sell manufactured furs in all parts of the United States, Canada and in a great many European Cities.

Prices above quoted are all for number one best grade furs. Lower grades including pale skins priced in proportion.

We eliminate the middleman entirely as we buy direct from the trapper and trader and sell direct to the consumer, thus we are able to pay you a better price than you can get elsewhere. WE MAKE RETURNS THE SAME DAY SHIPMENT IS RECEIVED.

If so desired when your shipments amount to \$100 or more, we will wire our bid and if not entirely satisfactory you may wire at our expense and we will ship to any place you designate.

All we ask of you is to be fair with yourself as well as with us and make us a trial shipment; the result will make you a steady shipper.

## PROBLEMS FACING STRICKEN WORLD

Shall Chaos or Reconstruction in Europe Follow the Great World War?

### NOW WEAK AND HEARTBROKEN

In Mourning and Poverty She Counts Her Dead and Looks With Eyes of Sadness Toward the Threatening Future.

#### Article II.

By FRANK COMERFORD.

August 1, 1914, was the day. On that day Germany declared war on Russia. The fire alarm rang around the world. Peasants in the field straightened their backs, listened and looked into the sun confused, wondering. Flags were unfurled, bands played, faces were white, tense and serious. Men left their work and talked in groups on the street corners. Women laid down their brooms, put aside their washing, and talked in whispers; sad lights were in their eyes. Children stopped playing. Something had happened. Evil things were ahead. August 3 and 4 found France and Great Britain mobilizing their sons. The torch was sweeping Europe—the fire of death had started.

For four long years—heart-sickening years—the world ran red. Men waded through mud and blood, fought, suffered, cursed, prayed, while back home in the manless houses women and children worked, cried, prayed and waited. The world was mad. Death poisoned every breath the people breathed.

It is over now, it is finished. A stunned, numbed, weak, heartbroken Europe is again sitting in the sun of peace. Europe is in dirty black rags. The black is mourning, the rags are poverty. Her face is deeply lined—trenches made by suffering. Her eyes are downcast and dead. Hope flutters weakly in her breast; faith has faded from her soul. Her home is a house of darkness. The fire on the hearth has turned to cold gray ashes. The kettle no longer sings, it moans. Her mind is weary, her body is wasted. Hunger has robbed her of her strength. Her stockless, shoeless feet are blue from the cold. Her lips wear starvation color. Ice in the winter's wind lashes her shivering, half-naked body. She mumbles as she stares vacantly into space—she is tired, so tired. As I beheld her it seemed to me that a face so troubled and sad must never have known a smile.

I listened to her mutterings. I found that she was counting. Over and over again she counted on her thin, tired, worn hands—she was counting her dead.

#### Thinking of Her Loss.

She was thinking. Her eyes looked over the hundreds of thousands of square miles of war zone, slashed with trenches, pitted and pockmarked by shells. She sees where they fell. No tears are in her eyes. Long ago the hurt had reached the point where tears dry up. Row upon row, line upon line, mile upon mile, white-painted wooden crosses mark their graves. For the most part they were her youngest born, her most beloved, who dug deep in the soil to sleep forever in the dark dugouts.

As they fell bleeding from steel and lead, choking from gas, writhing in agony from fire, they proved in the dying word they spoke that they were mere boys, as they had shown in their fighting that they were brave men. To the poppies they entrusted their message, and the red poppies remember the last word of Europe's dying sons, who went out into the great beyond with this last word on their lips, "Mother."

She has finished counting; an ache shudders through her bent body. She sighs and sobs, "Seven and a half million of my sons are dead."

Her thoughts turn to the living, her arms open to receive them, she holds them to her heart. They have come, but how?

Some with sightless eyes, doomed to grope through the world in a never-ending darkness, a night without stars or moon; sunless, black, hopeless days, and these, too, young men in the very morning of their day.

Others sentenced to silence—deaf and dumb. Never again will she hear their voices nor will they hear hers. Still others in wheel chairs, dwarfed, legless.

More hobbling on crutches, limping on canes.

Some with empty sleeves. Many with great scars, where once was a handsome face.

She sees them all, her heart bleeds; the twisted, the mangled, the torn. She is counting them, the 12,616,017, the wounded of the war.

#### War's Frightful Cost.

Her voice is husky, her hands are tired, but she must count on. Six and a half million of her sons were marked "missing and prisoners" in the official war score. Many of these have come back to her, but she does not question them—she dare not. Their faces tell of the unspeakable horrors they endured. She sees in their eyes a depth of pain that is unfathomable. She is a mother—she knows.

The war is over, but she is not over the war. Must she never stop counting? Is there no end to her losses? The graveyards are crowded. Her

thoughts turn to the dead who, while they did not die in the war, died because of the war. Those who went out in battle left life in a burst of glory. Others there were who fell in their tracks—exhaustion, broken hearts sent them "west." She has not forgotten how the home flank suffered. The stay-at-homes were not all slackers. They fought hunger and cold, bent their backs beyond the straining point. Worst of all, they waited. It is estimated that 20,000,000 civilians died from weakness, fatigue, strain, broken hearts—the horror of waiting destroyed resistance. These were the underfed older men and women, the scared, undernourished children. Is there any wonder that Europe has a death look in her eyes? Death has been her morning thought, it has been her night sob, and for four years made up of months, weeks, days, hours, minutes and seconds death has been her Nemesis.

She is now totaling. The figures are appalling. They stagger her imagination. It is easy to write them, impossible to understand their full meaning. The mind can't grasp it; the world is bewildered by the number. It is too stupendous, too horrible for understanding. Think of it, seven and a half million young men, for the most part between the ages of eighteen and thirty, the youth, the strength, the spirit, the man power of Europe, dead—twenty million from civil life dead, over twelve and a half million wounded.

Who can measure this loss? War brought death. It did more—it stopped birth. In the devastated regions of Belgium, France, Italy, Poland, parts of Russia and the Balkan countries, the birth rate fell to almost nothing. In England and Wales the birth rate in the last part of 1915 was 19.5, the lowest on record. Mallett calculated that the birth rate had fallen 12 per cent in England and Wales by 1916.

The Journal of Heredity quotes Savorgnan as having estimated that it will take England at least ten years, Germany 12 years, Italy 38 years and France 36 years to recuperate their populations. These calculations by Savorgnan were made before the fearful losses of the campaign of 1918.

A village in France, Blerncourt, tells what the war has done to the man power of Europe. This village, which is in the Chateau Thierry-Soissons district, had a population of a thousand people before the war. Its losses have been tabulated. Twenty-six soldiers from this village were killed in the war. Ninety-seven of the villagers died from war privations. The total of 123 is the death toll of a village of a thousand.

The figures I have quoted from the calculations of Savorgnan and Mallett were made before the war was finished. Since the war, estimates have been made, and these estimates show the situation to be even worse. In France I was told that 57 per cent of the men between twenty and forty years were listed as dead or incapacitated for work. Further, that it would take France over 70 years to recover her normal population.

It is said that it will take Italy 50 years and England 25 years to regain normality of population.

The human waste of the war is more than sad memories. The loss of man power makes a grave problem. It has thrown out of balance the domestic scheme of the world. It will be felt for years. There are a great many more young women than men. Home life is bound to suffer. There will be fewer marriages, fewer children. Statistics only tell part of the story.

(Copyright, 1920, Western Newspaper Union)

#### European Tarantula.

An eminent authority in such matters, in remarking that the tarantula is a spider, says of that terrifying creature that it is the Lycosa Tarantula, a species of spider found in some of the warmer parts of Italy and Spain. When full grown it is about the size of a chestnut and of a brown color. Its bite was at one time supposed to be dangerous and to induce a kind of "dancing disease," but now it is known not to be worse than the sting of a common wasp.

It is an old fable, extending to remotest times, that the bite of this spider would produce epilepsy or a strange dancing mania in its victims and that this epilepsy or madness could be relieved only by a particular kind of music. The tarantula of Italy and Spain—and it is found in those countries today—has hairy legs with black markings on them.

#### America's Debt to Jews.

Jews figured very prominently in the discovery of America by Columbus according to Rabbi David Philipson of Cincinnati. The first man who stepped on the shore of the new world was the interpreter of the expedition, Luis de Torres, a Jew. Bernal, the ship surgeon, was also a Jew, as were several members of the crew.

It is also now said to be established that the long-credited belief that Queen Isabella pawned her jewels to furnish Columbus with the funds for the trip is a legend. These funds, it is said, were furnished by two Jews, Luis de Santangel and Gabriel Sanchez. A letter by Columbus to Sanchez is still extant, in which he gives some account of his exploits.

#### Who Knows?

A friend of mine called upon a newly wedded pair and I happened to drop in. The bride had been a widow. My friend remarked to me, "You introduced them to each other, didn't you?" "Why, yes," I tactlessly blurted, "I introduced her to her first and second husbands and who knows but what I'll be the one to introduce her to her third one?"—Exchange.

R. H. Shotwell, a merchant of Craig, arrived on the City of Seattle Saturday morning from a business trip to the States. He was fortunate in making close connection as the Princess Pat left for the West Coast a few hours after his arrival. Mr. Shotwell is a member of the well known firm of C. E. Hibbs & Co.

## SCHOOL NOTES

The amount saved by the school children the past month was \$109.40.

The girls of the club are making cookbooks and would appreciate it if the ladies of the town would send in one or more of their favorite recipes with their signatures. Send the same to Ruth Tucker, secretary of the club, or leave at the Sentinel office.

## St. Philip's Church

### Alone—Its Perils.

St. Paul spoke of "perils by land, and perils by sea." Are there any dangers aside from those that St. Paul referred to in those words? A wood chopper once said "I have worked this month and saved up sixty dollars and I am going to town to have a big drunk." A friend said to him "Why do you do that? When it's over you will feel as though some one had knocked you out." "Well," he replied, "While it lasts I will feel as rich as old Vanderbilt." Had not that man been attacked while alone and there met his Waterloo? Do not the great tragedies of life come when men are alone? How to meet these dangers will be the theme at St. Philip's Church Sunday evening, Feb. 29. Good music promised. You are invited.

A deal was made in Seattle during the week for the sale of the store and waterfront holdings of the Petersburg Packing company to the Co-operative Association, Inc., of Petersburg, Alaska. The deal was handled by K. L. Steberg a well known real estate man of Petersburg, who is accompanied to Seattle by Eric Ness, who will be manager of the store.

The sale involves about \$80,000 and the stockholders of the Co-operative Association are the stockholders of the S. of N. Trading Union, whose store burned during the winter.

## Of Local Interest

Rev. Father Shepard of Ketchikan conducted services in the Catholic Church on Sunday.

Fred S. Johnson was aboard the City of Seattle northbound en route to Juneau from a trip to Portland.

Bert Tucker on Tuesday received the sad intelligence of the death of his mother which occurred at Indianapolis. She was 80 years of age and is survived by three sons.

Dr. D. A. Griffin was called to Bellingham this week on account of the serious illness of his father. He sailed on the City of Seattle yesterday.

H. W. Gartley, manager of the Willson & Sylvester Mill company left on the City of Seattle yesterday morning for a business trip to Seattle.

Mrs. W. D. Grant, who has been visiting relatives in Wrangell for several weeks, left on the City of Seattle yesterday for her home in Brownsville, Wash.

John A. Peterson is building a trolling boat for Arthur Brush, which will be 37 feet in length with beam 8.11 over planking. The boat will be powered with a 12 to 15 h. p. Standard.

According to the census report of Lester D. Henderson, Commissioner of Education for Alaska, more than half the white school children in Alaska were born in the Territory. Of the 2,290 white pupils enrolled more than 1,300 are native born.

Hand Laundering and Clothes Cleaning done satisfactorily.—Mrs. Thomas Ukass.

William Fletcher is building a seine boat for Joe Baronovich. It will be 50 feet in length with a 12½ foot beam and powered with a 45 h. p. engine.

Mr. and Mrs. Lahte are rejoicing over the arrival of a baby daughter born last Friday. The family reside near the Standard Oil station. Mr. Lahte is a fisherman.

The infant son of Mr. and Mrs. William Hooker passed away last Thursday.

Fred Amundsen and John Volcheck came in Friday from a few days' trapping in the vicinity of Union Bay. They brought in 31 mink and one otter, and sold their skins to a local buyer.

Charles Lynch who had been in the States for several months arrived home Saturday.

Mrs. Ida Uhler returned Saturday from an extended visit in Seattle.

The first garage for Wrangell is being erected on Fort street next to the jail by I. C. Bjorge.

Mrs. P. C. McCormack took passage to Juneau on the City of Seattle.

For the shave and haircut of satisfaction go to Ed Grigwire's shop, opposite drug store.

Mrs. Mary Peratovich left Saturday for Juneau to enter St. Ann's hospital. She was accompanied by her daughter, Mrs. Edward Smith.

G. H. Tozier made a trip this week to the trapping grounds up the Stikine river.

J. E. Evans, who spent the winter on the Sound, arrived in Wrangell Saturday to resume his duties at the sawmill.

The stores of Wrangell closed Monday afternoon on account of the previous day being Washington's birthday.

William Lewis is building a seine boat which will be 48 feet in length with an 11½ foot beam. Mr. Lewis has not yet decided upon an engine, but says that whatever engine he selects will be of not less than 30 h. p.

Ed Grigwire's dandruff treatment is the best on the market. Try it and be convinced.

Mr. and Mrs. Fred Wigg and Louis Wigg returned Tuesday from California where they have been sojourning for several months. They spent the greater portion of the time they were away in San Francisco but visited Pasadena, Los Angeles and numerous other places in Southern California. Miss Grace Wigg who is attending the University of California recently went before the California State Board of Pharmacy and passed successfully.

The hearing before Judge Jennings a few days ago in the matter of the Matheson estate resulted in a manner, which, it is assumed, is entirely satisfactory to all concerned. Mrs. William Patterson (formerly Mrs. F. Matheson) was continued as administratrix of the estate and required to file a satisfactory bond. Yesterday a surety bond for \$50,000 was filed with U. S. Commissioner Wm. G. Thomas. The bond was accepted, thus relieving P. C. McCormack, J. G. Grant and Donald Sinclair who have been acting as temporary bondsmen for more than a year.

Mrs. J. S. Morgan of Juneau was aboard the City of Seattle Saturday. While the vessel was in port Mrs. Morgan visited with her friends, Mrs. I. C. Bjorge and Mrs. J. W. Pritchett. She was returning to Juneau from Escondido, Calif., where she spent the winter.

Mrs. Matt Pellinen has returned from Juneau where she went for medical attention.

Chas. Darwell has a crew busy this week driving piles for the St. Michael Trading company dock.

FOUND—Locket & chain. Owner may recover by paying for this ad.

J. Bruce Polworth, of Portland is in Wrangell. Mr. Polworth is attorney for Mrs. William Patterson, administratrix of the Matheson estate.

The annual Firemen's dance held at the Redmen's hall Saturday night was a success in every respect.

Dr. S. C. Shurick returned from Juneau Tuesday evening on the Government boat Auklet.

The Moose lodge will give a social on the evening of Saturday, March 6. The affair will be invitational.

Hugh Chilberg of Seattle is in Wrangell today.

Hon. and Mrs. P. C. McCormack returned yesterday from a visit to Juneau.

Work will be started within another month by the Alaska Union Fisheries, Inc., on the construction of a cannery on the southeast coast of Baranoff Island, according to an announcement made by John Kayser, secretary of the company. A building large enough to accommodate a two line cannery will be erected this year, but only one line of machinery is to be installed. Work will be commenced just as soon as the weather will permit.

An Astoria, Ore., firm has agreed to have machinery ready for the cannery in time for installation by the time the fishing season opens.
